ESTANISLAO, RAN-JEL I.

Blk 10 Lot 6 Southville 8B San Isidro, Rodriguez, Rizal, 1860 • ranjelestanislao03@gmail.com • 09930017809

EDUCATION

Polytechnic University of the Philippines Quezon City 2022 – 2026
Bachelor of Science in Information Technology
Relevant Coursework: Database Management, Web Development, System Development, Quality Assurance, System Analysis & Design, Data Analytics

Kasiglahan Village Senior High School, Rodriguez, Rizal 2020 – 2022
Science, Technology, Engineering, and Mathematics (STEM) • With Honors

EXPERIENCE & PROJECTS

MyFleet Philippines Inc. — Backend Developer Intern 2026
Internal Operations & Fleet Management System • MongoDB, Express.js, React.js, Node.js (MERN Stack)
- Built a full internal operations system covering vehicle scheduling, trip scheduling, and fleet management
- Developed shuttle trip, single trip, and contractual vehicle modules with RESTful API endpoints
- Implemented driver and fleet management features including assignment, tracking, and record management
- Collaborated with stakeholders to ensure system logic aligned with real operational workflows
- Deployed the system to a production server and managed hosting configuration for live operations

Integrated Coffee Shop System (POS, IMS, OOS) — Backend Developer 2024 – 2025
Capstone Project • FastAPI (Python), MSSQL, React.js
- Led backend development for an integrated system covering point-of-sale, inventory, and online orders
- Designed and built RESTful APIs to manage data flow between POS, inventory, and order modules
- Ensured seamless UI-backend integration for smooth staff operations across all system modules
- Handled deployment and hosting of the application on a cloud hosting platform for end-to-end delivery

Inventory Management System with Vendor Integration — Backend Developer 2024
Academic Project • FastAPI (Python), MSSQL, React.js, HTML, CSS, JavaScript
- Developed an API-based purchasing module that connects the IMS with an external Vendor System
- Built inventory tracking, order management, real-time stock updates, and user authentication features
- Enabled two-way data synchronization between IMS and Vendor System via REST APIs

Hotel Booking System — Backend Developer 2023
Academic Project • C#, SQLite, HTML, CSS, JavaScript
- Built a complete hotel booking system with room reservation, availability management, and booking records
- Implemented all backend logic and database operations using C# and SQLite

TECHNICAL SKILLS

Languages & Frameworks: Python (FastAPI), C#, JavaScript, HTML, CSS, Node.js, SQL
Databases: MS SQL Server, SQLite, MongoDB
Tools & Platforms: React.js, Express.js, Node.js, FlutterFlow, Git, REST APIs
Deployment: Server deployment, cloud hosting platforms, production environment configuration
Core Competencies: Backend Development, Database Management, System Analysis, Web Development, Data Analytics
Soft Skills: Problem Solving, Critical Thinking, Teamwork, Communication, Time Management
